

**INFORMATION RELEASE**

19 August 2015

**EDMONTON, Alberta – 19 August 2015** – OilPaw Environmental Services Inc. announced today that they are offering a **100% No False Alarm Guarantee** on all their new leak detection technology installations for the hydrocarbon markets. If there is a false alarm, OP-ES will take an additional step and pay their clients \$1,000 CAD for each false alarm that occurs.

“We are proud of our technology and understand the hazards that false alarms create in the market,” said Jonathan Weselake, OilPaw’s President. “With a 100% No False Alarm Guarantee and a compensation to our clients if there is a false alarm; OilPaw is leading the industry with technology, service, and customer satisfaction. This is a game-changer for the Leak Detection market and for our clients.”

OilPaw’s guarantee covers all products that they design, supply, install, commission, and are part of their Service Delivery Model agreements. Unique to the leak detection market, OilPaw offers a wide-selection of leak detection technology from multiple manufacturers. OilPaw also provides expert Leak Detection consulting and risk assessment and mitigation strategies, something no other supplier provides.

Also starting today, OilPaw customers can take advantage of extended Service Delivery Model agreements at reduced costs and increased services, including the 100% No False Alarm Guarantee.

Although many companies in the hydrocarbon transportation and storage industry are looking to install more external leak detection, there is growing annoyance with false alarms and ineffective technology. Companies want to use more external leak detection, but have limited its use because of these challenges.

This guarantee from OilPaw offers a different kind of external leak detection experience, designed to earn trust in their products and services. With this guarantee, OilPaw set out to design a set of products and services that is part of the solution to false alarms.
